*the UI of kompose is something special,*
something, that sets it apart from others,
but feels natural in the android environement.
Some aspects of our process are documented here,
proving that its trickier than you might expect

Kompose

sales pitch

how to present kompose in under one minute?
we've created a sales pitch, and constructed Kompose to be the answer.

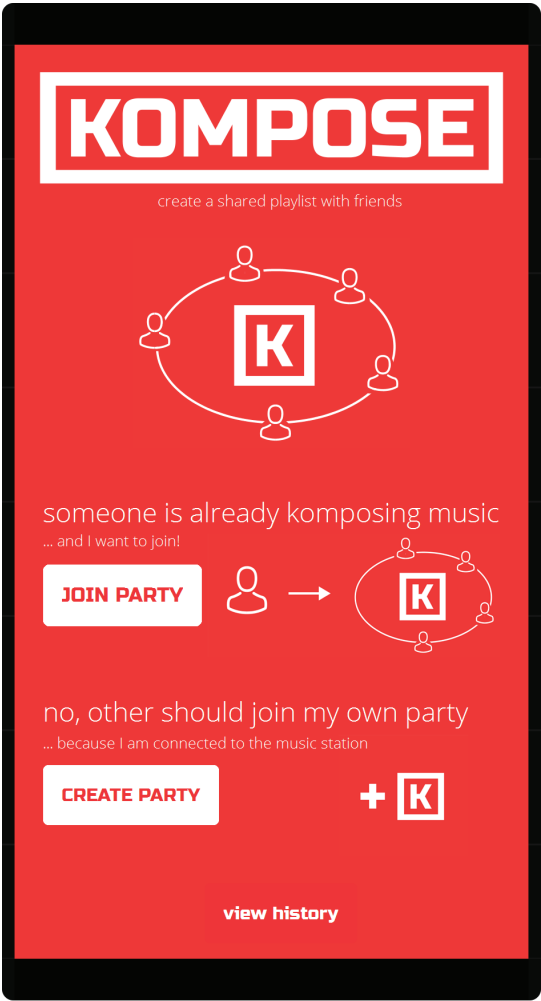

KOMPOSE

features

what would be needed core features for kompose to be a MVP?
we've created wireframes to make sure we're building the right thing.
